1. The following is an examiner's statement of reasons for allowance: The closest prior arts are US 4,440,788, US 6,403,830 and US 4,585,892. US'788, column 7, line 65, US'830, column 21, line 28 and, US'892, column 2, compound (VIII) teach structurally similar compounds as claimed herein. However, in US'788 and US'892, carbon attached to the carbonyl carbon is a secondary carbon as against a tertiary carbon in herein. US'830, teach a tertiary carbon, but teaches carboxylic acid rather than an amide. There is no motivation to arrive at the claimed compounds using the prior art of record. Inasmuch the compounds are patentable, process of making the compounds is patentable too. In re Ochiai 37 USPQ2d 1127.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
